

7th Grade La Jolla Class Trip

The seventh graders went kayaking at the La Jolla Cove and Cliffs. We saw a whale, dolphins, sea lions and seals as we carefully kept our kayaks upright on the relatively rough water. We also saw several different types of birds, and when we got to shore several students lost their sandwiches to the sea gulls. We enjoyed a picture perfect sunny southern California day; however we were challenged to get our kayaks over the 2-3 foot breakers. Once in the cove, the swells were awesome and six students were able to "catch a wave" and ride their kayaks to shore without tipping over. We appreciated the three instructors from La Jolla Kayak and Company and with their help we all had a better appreciation and respect for the power of the water in the Pacific.
